

Electric Sheet Metal Cutter

This electric power tool is designed for cutting sheet metal. It features a compact design and a circular cutting blade for efficient cutting.

Product Overview

High-Performance Sheet Metal Cutting

This electric sheet metal cutter is engineered for precision and efficiency in industrial metal fabrication tasks. Featuring a compact, ergonomic design with a durable motor housing, it provides the control necessary for clean cuts across various sheet materials. Its robust construction ensures reliability for professional workshop environments.

Design & Build

Color Scheme	Gray cutting head, Red motor housing, Black handle
Design Type	Compact electric handheld tool

Technical Features

Primary Application

Sheet Metal Cutting • Metal Fabrication

Cutting Mechanism	Circular cutting blade
