Product Overview

A compact and stylish design suitable for modern kitchen environments.

Professional Frozen Beverage Experience at Home

This advanced electric slushie maker utilizes patented RapidChill technology to transform your favorite liquids—including wine, coffee, soda, and juice—into perfectly frozen drinks without the need for additional ice. Designed for intuitive operation, it features a digital control panel with five preset settings for customizable temperature and texture, allowing you to achieve the perfect consistency every time. The unit is built for convenience, featuring a transparent design for easy monitoring, a unique sealing mechanism, and a modular structure that simplifies cleaning and maintenance.

Performance & Technology

Preset Programs	5 programs
Preparation Time	15 to 60 minutes
Keep Frozen Duration	12 hours
Continuous Smooth Effect	60 minutes

Features & Design

Compatible Beverages

- Wine
- Coffee
- Soda
- Juice
- Chocolate Milk

Key Features

RapidChill Technology, Digital Display, Transparent Viewing Window, Adjustable Texture Control, Ice Cream Cone Bracket

Design Options

4 styles

Maintenance & Usage

Tips for Best Results

For optimal slush consistency, sugar must be included in your recipe, as sugar-free mixtures may not freeze correctly. If you prefer sugar-free beverages, we recommend using sugar substitutes to ensure the perfect syrup consistency. The machine allows for customized temperature control, letting you adjust the output thickness to your preference.
