

# Electric Solenoid Spray Gun for Coatings

This electric spray gun utilizes a solenoid-activated mechanism to precisely control the flow of coatings. It is equipped with an adjustable nozzle for customizing spray patterns and flow rates.

## Overview

### Professional Electric Spray Gun

This high-performance solenoid spray gun is designed for professional applications requiring precise coating of paints and varnishes. Featuring a solenoid-activated mechanism, it ensures consistent and uniform coverage for both detail work and large surface areas. The lightweight construction and ergonomic design minimize user fatigue, while the durable, detachable container facilitates efficient operation and maintenance.

## Technical Specifications

Input Power	110 W
Rated Voltage	220-240V
Frequency	50/60Hz

## Performance Metrics

### Core Performance

<b>800 ml</b> Reservoir Capacity	<b>300 ml/min</b> Max Flow Rate	<b>60 din/sec</b> Max Viscosity
Nozzle Diameter	0.8 mm	

## Physical Properties

Net Weight	1.8 kg
Cable Length	2 m

## Certifications and Compliance

Safety Approvals	VDE approved
------------------	--------------

## Included Accessories

### Supplied Components

- Viscosity measuring cup
- Cleaning pin
- 2x Valves
- 0.8mm spare nozzle
- Wrench
