

# Electric Space Heater with Adjustable Pedestal

This is a standalone electric space heating apparatus. It features a circular heating element protected by a wire mesh grill, mounted on an adjustable-height pedestal stand.

## Product Overview

### Efficient Localized Heating

This electric space heater is engineered to provide reliable and consistent warmth for indoor environments. Featuring an adjustable-height pedestal stand, the unit allows for precise positioning to direct heat where it is needed most. With a durable circular heating element protected by a safety wire mesh, it combines safety with high-performance heating capability.

## Technical Specifications

### Recommended Environment

Indoor Use Only

Heating Element Type	Circular heating element
Safety Design	Wire mesh protective grill, Indoor rated
Height Adjustment	Yes
Control Method	Base-mounted control knobs
