

# Electric Space Heater with Circular Heating Element

This space heater is designed for household use, providing localized warmth. It features a circular heating element protected by a grill, mounted on a stable base for indoor placement.

## Product Overview

### Sun Heater 1682A Performance

The Sun Heater 1682A is a high-performance space heating apparatus specifically engineered for indoor household environments. Its design centers around a specialized circular heating element that provides efficient and localized warmth to any room. Protected by a durable safety grill and mounted on a robust yellow base, this heater combines functional utility with a reliable build for consistent indoor comfort.

## Technical Details

Heating Element	Circular Heating Element
Design Features	Indoor Use, Protective Grill, Stable Yellow Base
Primary Application	Household localized heating
