

Electric Space Heater with Metal Mesh Grill

This electric space heater provides efficient warmth with its radiant heating elements. It features a metal mesh grill for safety and a curved design for a modern look.

Product Overview

Versatile Indoor Heating Solution

This electric space heater is engineered for efficient and reliable indoor warming. Featuring a modern grey and white plastic housing, its curved design integrates seamlessly into professional or domestic environments. The integrated metal mesh grill provides essential safety while ensuring optimal airflow for consistent radiant heat delivery.
