

Electric Space Heater with Protective Grill

This electric space heater is designed to provide localized warmth. It features a metallic protective grill on the front and a control knob on the side for adjusting settings.

Product Overview

Efficient Localized Warming

This electric space heater is designed to provide rapid and consistent warmth for indoor environments. Featuring a robust metallic protective grill, it balances safety with performance by shielding the heating elements while ensuring optimal heat distribution. The user-friendly control knob allows for precise adjustment of heating settings to meet specific comfort requirements.

Technical Specifications

Application

Indoor Use • Localized Heating

Design Type

Cylindrical electric space heater

Safety Features

Metallic protective grill, Enclosed heating elements

Control Method

Manual adjustment knob
