

Electric Space Heater with Wire Mesh Grill

This is a household electrical appliance designed for space heating. It features a circular heating element protected by a wire mesh grill and control knobs for adjusting the heating settings.

Product Overview

Efficient Localized Heating

This electric space heater is a reliable solution for indoor climate control, designed to provide consistent warmth in localized areas. Featuring a durable wire mesh grill for safety and intuitive control knobs for heat management, it offers a practical and user-friendly experience. Its compact design and sturdy circular base make it an ideal choice for various indoor heating requirements.
