

Electric Space Heater

This electric space heater is designed for household use. It features a circular heating element protected by a metal grill and a plastic frame, with a rotary control knob for adjusting heat settings.

Product Overview

Efficient Localized Heating Solution

This electric space heater is engineered for effective localized warming in indoor environments. Featuring a robust circular heating element encased in a durable protective metal grill, it ensures both safety and consistent heat distribution. The integrated rotary control knob provides simple, intuitive adjustment of heating levels to suit individual comfort preferences.

Technical Specifications

Design & Construction

- Circular heating element
- Protective metal grill
- Durable plastic frame
- Rotary base control knob

Ideal Usage

Indoor use, Localized heating, Residential
