

Electric Spindle Turning-Milling Compound Machine Tool

This electric spindle turning-milling compound machine tool integrates turning and milling capabilities. The state-patented electric spindle can realize clamping, milling, drilling, and replacing grinding with turning.

Product Overview

Precision Turning-Milling Compound Machine

This intelligent electric spindle turning-milling compound machine tool is engineered for high-precision machining operations. It integrates turning, milling, and drilling capabilities, allowing for the manufacturing of complex parts with a single setup. The robust frame ensures stability during high-speed operations, while the advanced electric spindle provides precise control and efficient material removal.

Capabilities

Machining Functions	Turning, Milling, Drilling, Clamping, Grinding
---------------------	--

Technical Details

Model Identifier	CXF360-D
Patent Status	Yes
Application	Lathe
