Product Overview

Professional Grade Meat Processing

This electric meat grinder is engineered with a high-quality stainless steel body, ensuring both durability and adherence to international sanitation standards. Designed for efficiency, it features a large-capacity stainless steel feeding tray and a powerful motor equipped with a built-in circuit breaker for maximum protection. The unit is optimized for both home and commercial kitchen environments, offering easy disassembly for thorough cleaning and maintenance.

Construction & Materials

Body Material	Stainless Steel
Compliance	International Sanitation Standard

Performance & Safety

Safety Features

- Built-in circuit breaker
- Water-resistant switch cover
- Overheating protection via ventilation slots

Motor Performance

Low-noise operation • High efficiency

Components & Accessories

Included Blades

- Round knife
- Cross blade
