

Electric Stand Fan with Adjustable Airflow

This electric stand fan features a circular base with control buttons and a telescopic stand. The rotating fan head is enclosed within a protective grille and has multiple blades designed to circulate air.

Overview

Efficient Cooling Solution

This electric stand fan is designed for versatile indoor climate control, offering reliable airflow for homes or offices. Featuring a telescopic stand and adjustable settings, it allows users to customize the cooling experience to suit their environment. The unit is built with a protective grille and a stable circular base, ensuring both safety and consistent performance during operation.
