

Electric Stand Fan with Multi-Directional Oscillation

This electric stand fan provides versatile air circulation through multiple oscillation systems. It features a protective mesh cover and is available with either a 45W or 55W motor, influencing blade design.

Overview

Advanced Air Circulation Solution

This high-performance electric stand fan is engineered for versatile air circulation in professional environments. It features unique multi-directional oscillation modes, including standard left-to-right, figure-8 oval patterns, and cross-oscillation options. With customizable motor power and robust blade design, it provides efficient cooling tailored to specific room requirements.

Technical Specifications

Motor Power Options

45 W

Standard Motor

55 W

High-Performance Motor

Oscillation Systems

- Standard Left-to-Right Oscillation
- Figure-8 (Oval-shaped) Airflow
- Cross Oscillation (Up-and-Down and Left-to-Right)

Design Features

Protective Mesh Cover, Adjustable Base, Customizable Airflow
