

Electric Standing Pedestal Fan with Remote Control

This electric standing fan is designed for home or office use. It features multiple speed settings, timer, and oscillation options, controllable via remote.

Overview

Versatile Air Circulation

This advanced electric standing pedestal fan is engineered for versatile performance in home and office environments. Featuring customizable airflow through 8-speed settings and 3 distinct wind modes, it ensures optimal comfort throughout the day or night. With its intelligent 7.5-hour timer and remote-controlled oscillation systems, this fan provides a sophisticated and convenient solution for any interior space.
