

Electric Steam Iron for Garment Care

This electric steam iron combines heat and steam for effective wrinkle removal. It is designed to press and refresh garments.

Product Overview

Professional Garment Care Solution

This electric steam iron is engineered for high-efficiency garment care, featuring a robust internal structure designed for consistent steam distribution. The assembly includes a precision-engineered base plate and a durable heating element, ensuring reliable performance for professional or commercial use. Its ergonomic design and protective outer shell provide both user comfort and long-term durability in demanding environments.

Technical Specifications

Construction Components

- Precision-engineered base plate
- Resistive heating element
- Ergonomic protective outer shell
- Internal steam distribution framework

Heating Element	Resistive heater with multi-terminal power input
Design Features	Ergonomic Form, Internal Steam Distribution, Modular Assembly
