

Electric Steam Iron for Garment Care

This steam iron is designed for efficient and effective garment care. It features a durable soleplate for smooth gliding and even heat distribution.

Product Overview

Professional Garment Care Solution

The TY2201A steam iron is engineered for high-efficiency garment care across a wide variety of fabric types. It combines a durable, smooth-gliding soleplate with adjustable temperature control to ensure optimal heat distribution and fabric safety. Equipped with a high-performance steam system and integrated water reservoir, this iron facilitates rapid wrinkle removal while maintaining user comfort through its ergonomic handle design.

Technical Specifications

Fabric Compatibility

- Delicate fabrics
- Standard garments
- Heavy-duty materials

Key Performance Metrics

1 enabled

Continuous Steam Generation

Safety Features

Automatic Shut-off, Temperature Control
