

Electric Steam Iron for Garment Care

Electric steam iron designed for efficient and effective garment care. This appliance features a robust heating element for rapid steam generation and incorporates a durable, corrosion-resistant soleplate.

Overview

Professional Garment Care Solution

This electric steam iron is engineered for both home and commercial garment care, offering efficient wrinkle removal across various fabric types. It features a robust heating element for rapid steam generation and a durable, corrosion-resistant soleplate that ensures smooth gliding and even heat distribution. Designed with user comfort and safety in mind, the iron includes an ergonomic handle, a stable base, and automatic shut-off functionality.
