

Electric Steam Iron for Garment Care

This electric steam iron is designed for efficient and effective garment care. Its adjustable temperature control allows for precise heat settings, suitable for delicate to heavy-duty fabrics.

Product Overview

Efficiency and Performance

The SIC-5058 steam iron is engineered for high-performance garment care, offering versatile ironing modes including dry, steam, vertical steam, and water spray. With its flexible power options and 360-degree swiveling cable, it provides maximum maneuverability for diverse fabric types. Built-in safety measures, such as overheat protection, ensure reliable operation for both professional and household environments.

Technical Specifications

Power Performance

2000 W
Max Power

280 ml
Water Capacity

Available Wattage Configurations

- 1200W
- 1400W
- 1600W
- 1800W
- 2000W
