

Electric Steam Iron with Variable Settings

This electric steam iron is designed for efficient garment care. It features variable steam settings, a durable soleplate, and an anti-drip system.

Product Overview

Professional Garment Care

This high-performance electric steam iron is engineered for efficient and effective garment care in professional or home environments. It features a durable soleplate designed for smooth gliding and even heat distribution across various fabric types. With versatile steam settings, including vertical steam and adjustable control, this iron offers the precision needed to tackle tough wrinkles while ensuring safety and longevity through advanced anti-calc and auto-off features.

Technical Specifications

Power (230V)

2000 W

Power Output

2200 W

Max Power

Power (120V)

1500 W
