

Electric Step-Through Tricycle Scooter

This electric tricycle scooter is designed for personal transportation. It features a step-through frame, comfortable seat with armrests, and a rear basket.

Overview

Compact Electric Mobility Solution

The CJ-005 is a versatile electric tricycle scooter engineered for personal transportation, featuring a convenient step-through frame design for easy accessibility. It prioritizes rider comfort with an ergonomic seat equipped with armrests and offers practical utility through an integrated rear cargo basket. Designed for stability, this tricycle features a three-wheel configuration and operates on a quiet, emission-free electric powertrain.
