

Electric Stew Pot with Non-Stick Inner Pot

This electric stew pot is designed for stewing and slow cooking. It has a non-stick inner pot for easy cleaning and offers multiple cooking settings.

Product Overview

Commercial Grade Stewing Solution

This high-capacity electric stew pot is engineered for demanding commercial environments such as hotels, corporate canteens, and large-scale catering operations. Designed to serve between 10 to 50 people, it features a robust heating system with advanced temperature control and safety protections. The non-stick inner pot ensures easy cleaning and consistent cooking results for soups, stews, and slow-cooked dishes.
