

Electric Stew Pot with Non-Stick Inner Pot

This electric stew pot is designed for cooking rice and stews. It features a non-stick inner pot and an automatic keep-warm function.

Overview

Commercial Grade Stewing Solution

This electric stew pot is engineered for high-volume environments such as hotels and canteens, capable of serving 10 to 50 people with ease. Designed with commercial-grade components, it features a strengthened heating plate and advanced magnetic control switches for superior performance. Safety is prioritized through integrated over-temperature protection and automatic shut-off features, ensuring reliability in busy professional kitchens.
