Product Overview

High-Efficiency Electric Straddle Stacker

The PWS-i Series full electric straddle stacker is designed to replace manual and semi-electric models, delivering superior efficiency and effortless pallet stacking. Featuring an ergonomic long tiller arm and a patented multifunction intelligent handle, this unit ensures comfortable operation and precise control. Built for durability and performance, it includes a robust metal cover and advanced light-sensor switching technology for a longer service life.

Key Features

Performance Metrics

1500 kg
Load Capacity

Design Advantages

- Patented Multifunction Intelligent Handle
- Long tiller arm design for easy steering
- Light-sensor inching switch for improved reliability
- Durable metal cover construction
- Straddle leg design for enhanced stability

Operational Modes

Turtle Speed Mode, Up-right Drive, Full Electric Operation

Technical Specifications

Technical Summary

Feature	Detail
Switch Type	Light-sensor Inching
Operation	Up-right Drive
Construction	Metal Cover
Travel Modes	Turtle Speed / Quick Speed
