Product Overview

High-Performance Submersible Solution

This electric submersible pump is designed for reliable and efficient water transfer across a variety of settings, including garden irrigation, drainage, and general water supply. Constructed with durable stainless steel and PPO materials, it ensures longevity and consistent performance in both clean and slightly dirty water. The inclusion of an automatic float switch allows for seamless, hands-free operation based on fluctuating water levels.

Performance Metrics

Maximum Capacity

145 USGPM

Capacity

Maximum Head

242 feet

Rotational Speed

2900 rpm, 3500 rpm

Operational Limits

Max Liquid Temperature

40 °C

Max Immersion Depth

7 m

Max Particle Size

5 mm

Construction & Features

Materials

- Stainless Steel
- PPO

Automatic Operation

Yes

Typical Applications

Cellar Drainage, Swimming Pools, Gardens, Ponds, Water Supply
