

Electric Submersible Water Pump

This submersible pump is engineered for efficient water removal and transfer. It features robust construction for reliable operation in demanding environments.

Product Overview

High-Efficiency Submersible Sewage Pump

This submersible sewage pump is engineered for heavy-duty water transfer and drainage applications in demanding environments. Featuring advanced motor technology with class F copper windings and corrosion-resistant materials, it offers high-performance reliability for irrigation, sewage systems, and industrial water management. The unit is designed with precision components to ensure long service life and energy-efficient operation.

Technical Specifications

Insulation Class	Class F
Motor Heat Resistance	155
Certifications	ISO 9001, ROHS, CE

Construction & Materials

Material Specifications

Component	Material / Treatment
Motor Body	Stainless Steel
Pump Body	Electrophoresis coated cast iron
Stator	100% Copper wire

Applications

Suitable Applications

- Sewage handling
- Domestic water supply
- Water transfer
- Pressure boosting
- Irrigation
- Drainage systems
