

Electric Telescopic Pole Pruner

This electric pole pruner is designed for trimming branches at a distance. Its telescoping pole provides extended reach, while the electric motor ensures efficient cutting.

Product Overview

High-Reach Electric Pruning Solution

This electric pole pruner is expertly designed for trimming and pruning branches at a significant distance, eliminating the need for hazardous ladder work. It features a robust telescoping pole for extended reach and a powerful electric motor to ensure efficient, clean cuts. Ideal for professional maintenance of trees and shrubs, this tool prioritizes ease of use and maneuverability.
