

Electric Tile Cutter with Diamond Blade

This electric tile cutter is designed for precise and efficient tile cutting. It features a diamond blade for clean cuts, an adjustable cutting guide for accurate angles, and a water cooling system.

Overview

Professional Electric Tile Cutter

This electric tile cutter is engineered for precision and efficiency in high-demand tile installation environments. Featuring a powerful 550W motor and a diamond-edged blade, it delivers clean, professional cuts through various tile materials. The unit is built with a durable welded metal frame and an adjustable table, providing the stability and versatility required for complex angle and bevel cuts.

Technical Specifications

Power Output

550 W

Power

Mains Voltage	230V/50Hz
No Load Speed	2980 r/min
Disc Diameter	180 mm
Max Cutting Thickness	32 mm

Features

Design Features	Welded Metal Frame, Turnable Table, Magnetic Switch, Angle Cutting, Bevel Cutting
Packaging Availability	Yes
