

Electric Tile Cutter

The electric tile cutter is a precision tool for accurately and efficiently cutting tiles. It features a stainless steel work surface, a sliding table, and an integrated water cooling system.

Product Overview

Precision Electric Tile Cutter

This electric tile cutter is a precision-engineered tool designed for high-efficiency cutting of ceramic, porcelain, and stone tiles. It features a robust stainless steel work surface and a sliding table mechanism to ensure smooth, controlled operation for professional results. Equipped with an integrated water cooling system and a high-quality diamond blade, it minimizes dust while maintaining optimal cutting temperatures for extended blade life.

Technical Specifications

Blade Type	High-quality diamond blade
Work Surface Material	Stainless steel

Features & Safety

Key Features

- Sliding table for smooth cuts
- Integrated water cooling system
- Adjustable cutting guide
- Non-slip base

Safety Features	Blade guard, Non-slip base, Dust reduction system
-----------------	---

Application

Compatible Materials

Ceramic • Porcelain • Stone
