

Electric Tile Saw

This electric tile saw is designed for cutting tiles with precision. It features a circular blade enclosed within a protective housing and a water tray to cool the blade and reduce dust.

Overview

Professional Electric Tile Saw

This electric tile saw is engineered for high-precision cutting, making it an essential tool for professional tile installers and serious DIY enthusiasts. The design features a robust metal frame with a four-leg stand for maximum stability during operation. An integrated water cooling system helps maintain blade longevity and minimizes dust, ensuring a cleaner and more efficient workspace.
