

Electric Tow Tractor

This electric tractor is designed for towing and material handling applications. Its compact design allows for maneuverability in tight spaces, and it features a comfortable operator seat and durable construction for industrial environments.

Overview

Industrial Electric Tow Tractor

This electric tow tractor is engineered for efficient material handling and towing applications in demanding industrial environments. Its compact design ensures excellent maneuverability within tight spaces, making it an ideal solution for warehouses, airports, and manufacturing facilities. The electric powertrain provides a quiet, emission-free operation, while safety features like headlights, taillights, and a beacon enhance visibility during use.

Performance & Capacity

Towing Capacity

2 tons

Towing Capacity

Features

Design Highlights

- Compact chassis for tight spaces
- Ergonomic operator seat
- Durable industrial construction
- Emission-free electric powertrain

Safety Equipment

Headlights, Taillights, Safety Beacon

Application

Suitable Environments

Warehouses • Airports • Manufacturing Facilities
