

Electric Tow Tractor for Material Handling

The Electric Tow Tractor is a versatile and efficient vehicle designed for material handling and towing applications in various industrial settings. Its compact design allows for maneuverability in tight spaces, while its electric powertrain ensures quiet and emission-free operation.

Overview

Industrial Material Handling Solution

The Electric Tow Tractor is a high-performance vehicle engineered for efficient material handling and towing in demanding industrial environments. Featuring a compact and highly maneuverable design, it is perfectly suited for navigating tight spaces within warehouses, factories, and distribution centers. Its electric powertrain delivers quiet, emission-free operation, while the ergonomic operator station and robust chassis ensure long-term reliability and comfort.

Performance

Powertrain Type	Electric
-----------------	----------

Features

Key Features

- Compact maneuverable chassis
- Emission-free operation
- Ergonomic operator seating
- Intuitive control system
- Heavy-duty construction

Applications

Suitable Environments	Warehouses, Factories, Distribution Centers
