

Electric Towel Warmer Radiator with White Powder Coating

This electric towel radiator features a white powder coating finish for enhanced durability and a clean look. Certified to EN442 and CE standards, it provides high heat output and ensures safety for efficient towel warming and bathroom heating.

Product Overview

High-Efficiency Electric Towel Radiator

This electric towel warmer radiator features a professional-grade white powder coating, ensuring both aesthetic appeal and long-term durability. Engineered for optimal performance, the unit is fully compliant with EN442 and CE standards, guaranteeing consistent heat output and operational safety. Its independent electric design eliminates the need for plumbing integration, making it an ideal choice for convenient bathroom heating and towel drying in any modern setting.
