

Electric Trailer Jack with Remote Control

This electric trailer jack is designed for ease of use when hitching and unhitching trailers. A remote control allows for operation from a distance, enhancing safety and efficiency.

Product Overview

Electric Trailer Jack with Remote Control

This electric trailer jack is designed for maximum convenience and ease of use when hitching and unhitching your trailer. Equipped with a powerful motor, it delivers smooth, reliable lifting and lowering action, while the included remote control allows for safe operation from a distance. Built for durability in outdoor environments, it also features integrated LED lighting for low-light visibility and a manual override system for emergencies.
