

Electric Traveling Suspension Crane

Suspension crane is an electric traveling crane that operates on rooftops. It is applicable to plants, warehouses and other places, and widely used in machining, assembly, repair, and handling lifting operations.

Product Overview

Industrial Electric Suspension Crane

This electric traveling suspension crane is designed for roof-mounted installation, providing an ideal solution for facilities without corbels such as warehouses and workshops. It features a compact, rigid structure that offers simple operation, low noise levels, and high safety standards for critical material handling. With nearly 30 years of specialized design experience, the system is engineered to excel in machining, assembly, repair, and heavy lifting operations.

Technical Specifications

Traveling Speed Options

- Dual speed
- Frequency control

Working Level	A4
Operation Modes	Ground Control, Remote Control
Hoist Compatibility	CD Electric Hoist, MD Electric Hoist

Key Advantages

Primary Benefits

Compact Structure • Rigid Design • Low Noise • Safe & Reliable • Customizable
