Overview

Reliable Passenger Transport Solution

This electric tricycle is a mature and versatile vehicle designed for efficient passenger transport. Featuring an eco-friendly electric motor and the latest EEC certification, it is engineered to adapt to diverse international requirements. Its robust frame, stable three-wheel design, and passenger-focused features make it an ideal choice for urban commuting and commercial passenger services.

Performance

Key Performance Metrics

1000 W Motor Power	32 km/h Max Speed	60 km Max Range
------------------------------	-----------------------------	---------------------------

Charging Time	6-8 hours
---------------	-----------

Technical Specifications

Battery System	72V 20AH Lead Acid
Dimensions	2075 x 835 x 1020 mm
Tyre Specification	3.0 x 12

Safety & Features

Certifications	EEC Certified
Braking System	Front disc, rear drum
