

Electric Trolling Motor for Boats

High-thrust electric trolling motor designed for boats and marine applications. It provides quiet and efficient propulsion for fishing and maneuvering.

Product Overview

High-Performance Marine Propulsion

This high-thrust electric trolling motor is engineered for both freshwater and saltwater marine environments. It features a durable composite shaft and a weedless propeller design, ensuring reliable performance in diverse water conditions. Designed for quiet and efficient propulsion, it provides excellent maneuverability for fishing and general boating needs.

Technical Specifications

Propulsion Type	Electric
Shaft Material	Composite
Speed Control	Variable

Features & Compatibility

Suitable Environments	Freshwater, Saltwater
Propeller Type	Weedless
Mounting System	Adjustable Transom Bracket
