Product Overview

Industrial Cleaning Performance

This electric two-stage pressure washer is engineered for demanding industrial and commercial cleaning environments. Featuring a robust, wheeled frame, it combines high-performance motor capabilities with durable construction to effectively remove grime and contaminants. Designed for heavy-duty reliability, it includes safety features like thermal overload protection and corrosion-resistant brass fittings.

Technical Specifications

Rated Pressure	110 Bar
Input Power	2300 W
Rated Voltage	220 V
Motor Speed	2800 RPM
Nozzle Model	050

Standards & Compliance

Executive Standard	JB/T6284-2007

Design & Construction

- Robust frame with wheels for portability
- Thermal overload protection
- Grounded electrical system
- Corrosion-resistant brass fittings
- Integrated pressure gauge
