

Electric ULV Sprayer for Agriculture

This electric sprayer utilizes a diaphragm pump to ensure stable pressure. It is equipped with a governor to adjust pressure between 0.2-0.4 MPa, suitable for various crops and growing seasons.

Product Overview

The electric sprayer features a robust design suitable for various agricultural and sanitation spraying tasks.

Professional Electric ULV Sprayer

This electric sprayer is designed for high-efficiency applications in agriculture, facility farming, and sanitation. It utilizes a reliable, self-made diaphragm pump to ensure consistent pressure stability during operation. With an integrated pressure governor and undervoltage protection, this unit offers a safe, user-friendly, and versatile solution for various crop protection and pest control needs.

Technical Specifications

Operating Pressure

0.2 MPa
Min Pressure

0.4 MPa
Max Pressure

Pressure Control

Yes

Safety & Features

Safety Features

Undervoltage Protection, Adjustable Pressure, Stable Diaphragm Pump

Applications

Primary Applications

- COFCO oil crop pest control
- Facility agriculture (vegetable greenhouses)
- Health and epidemic prevention
