

Electric ULV Sprayer with Adjustable Nozzle

This electric sprayer is designed for ultra-low volume (ULV) applications. It features an adjustable nozzle assembly and a cone-shaped diffuser to ensure even distribution of the spray.

Product Overview

Professional Electric ULV Sprayer

This electric ULV (Ultra-Low Volume) sprayer is engineered for precision application in both indoor and outdoor environments. Featuring a compact, handheld design with an integrated tank, it offers portability and ease of use for professional sanitation or pest control tasks. The adjustable nozzle and telescopic wand assembly ensure controlled, uniform distribution of liquids for efficient coverage.

Technical Specifications

Power Source	Electric
Nozzle Configuration	Adjustable nozzle with integrated blue cone-shaped diffuser

Design Features

Key Design Elements

- Handheld control unit
- Integrated handle
- Cylindrical liquid tank
- Telescopic wand assembly

Application

Suitable Environments	Indoor, Outdoor, Sanitation, Pest Control
