

Electric Underfloor Heating Mat

This under tile heating mat cable features inner fluoropolymer insulation and drain wire shielding with Alu-foil, and a durable outer sheath. It provides comfortable heat for indoor floor heating.

Product Overview

Comfort Heating Solution

This electric underfloor heating mat provides a reliable and efficient comfort heat solution for both residential and commercial spaces. Engineered with a thin heating cable fixed to a robust, self-adhesive fiberglass mesh, it allows for quick and straightforward installation. The system is versatile, suitable for use in bathrooms, living rooms, and basements, and can be embedded in tile adhesive, self-leveling compounds, or thin screed beds.
