

Electric Utility Tricycle with Cargo Box

This electric tricycle is designed for utility and transportation. It features a cargo box and electric motor, making it suitable for delivery, farm work, and personal transportation.

Overview

Professional Utility Tricycle

This electric utility tricycle is engineered for efficient cargo transport and versatile delivery applications. Featuring a robust metal frame and a spacious integrated cargo box, it provides a stable platform for goods in farm, commercial, or logistics settings. The vehicle utilizes an electric motor to deliver eco-friendly performance while maintaining the utility of a traditional motorcycle platform.
