

Electric Utility Vehicle with Cargo Bed

This electric utility vehicle is equipped with seating for six, a roof and windshield. It is designed for transporting personnel and light cargo in industrial or recreational settings.

Product Overview

Versatile Industrial Utility Vehicle

This electric utility vehicle is engineered for efficient personnel and light cargo transport in diverse environments. With seating capacity for six passengers and a dedicated rear cargo bed, it balances utility with comfort. Designed for reliability, it features robust off-road tires, a protective roof, and a windshield, making it suitable for both industrial sites and recreational use.
