Product Overview

Industrial Electric Valve Control

The DKX-type electric control box is designed for seamless integration with valve actuators to manage opening and closing operations. It supports both independent and centralized control configurations, offering flexibility for various industrial setups. Available in normal, outdoor, and explosion-proof variants, this drawer-style unit provides a robust solution for machinery control.

Technical Specifications

Rated Current

40 A

Current Capacity

Model Type

DKX-C

Compatible Actuator Types

Z Type, Q Type, DQ Additive

Configuration & Mounting

Mounting Options

- Drawer-type
- Wall-mountable

Environmental Protection

Normal • Outdoor • Explosion-proof
