

Electric Vehicle AC Charger

This AC charger provides a single-output charging solution for electric vehicles. It features a durable enclosure, standard EV charging connector, and a user-friendly interface with an EV ChargePoint indicator.

Overview

Compact and Intelligent EV Charging

This electric vehicle AC charger offers a compact, A4-sized design that combines elegance with high performance. Engineered for reliability in harsh environments, it features robust IP65 protection and salt-mist resistance. With intelligent power management, emergency stop capabilities, and flexible connectivity options like Wi-Fi, Ethernet, and app monitoring, it provides a seamless charging experience for professional and residential applications.

Technical Specifications

Protection Grade

IP65 • Salt-mist resistant

Connector Standard

IEC 62196 Type II

Communication Protocol

OCPP v1.6

Features

Safety Protections

- Full electrical protection
- Over-temperature protection
- Under-temperature protection
- Emergency stop

Connectivity

Wi-Fi, Ethernet, App Monitoring

Installation

Mounting Options

- Wall-mounting
- Pole-mounting

Form Factor

A4 print paper size
