

Electric Vehicle Charging Station with Integrated Cable Management

This electric vehicle charging station allows for the efficient charging of electric vehicles. It features an integrated cable management system and a digital display showing charging information.

Product Overview

Efficient Charging Solution

This electric vehicle charging station is engineered for both residential and commercial environments, offering a seamless charging experience. It features a sleek, modern design that integrates a digital display for real-time charging status updates. The built-in cable management system ensures the charging cable remains organized, preventing tangles and potential trip hazards.
