

# Electric Vehicle Charging Station

The EV charging station is a reliable solution for electric vehicle charging. Designed for indoor and outdoor use, it features a durable enclosure and a user-friendly interface.

## Overview

### Professional EV Charging Solution

This electric vehicle charging station is a robust and reliable solution designed for both indoor and outdoor environments. It supports Level 2 charging, providing efficient and rapid power delivery for a wide range of electric vehicles. Equipped with advanced safety features and remote connectivity, it is an ideal, future-proof infrastructure choice for commercial parking lots, residential complexes, and public charging hubs.

## Technical Specifications

### Environment

Indoor • Outdoor

### Charging Level

Level 2

### Safety Protections

Overcurrent Protection, Overvoltage Protection, Ground Fault Detection

## Connectivity & Management

### Remote Features

- Remote monitoring
- Usage tracking
- Pricing management
- Remote diagnostics

## Application Areas

### Ideal For

- Commercial parking lots
- Residential complexes
- Public charging locations
