

Electric Vehicle Parts and Accessories

This selection includes a variety of components for electric vehicles. These parts and accessories support the maintenance, repair, and customization of electric vehicles.

Product Overview

High-Performance Water Transfer Solution

This self-priming centrifugal water pump is powered by a reliable 4-stroke gasoline engine, engineered for high-volume water transfer applications. It is ideal for irrigation, dewatering, and general pumping tasks where portability and consistent performance are required. The unit features a durable cast iron impeller and volute, alongside safety features like a low oil shutdown system to ensure long-lasting operation.

Performance Metrics

Maximum Flow Rate

36 m³/h

Max Flow Rate

Maximum Head

28 m

Engine Specifications

Engine Type	4-stroke, air-cooled gasoline engine
Displacement	97.7 cc
Output Power	2.5 HP
Starting Method	Recoil starter

Design & Build

Inlet/Outlet Diameter	2 inches
Key Components	Cast iron impeller, Cast iron volute

Safety & Features

Safety Systems

Low oil shutdown
