

# Electric Waffle Maker with Adjustable Temperature

Electric waffle makers are available in single and double plate models. These feature adjustable temperature controls and non-stick cooking surfaces.

## Product Overview

Professional-grade single and double plate waffle makers featuring stainless steel construction and adjustable heat controls.

### Professional Electric Waffle Makers

This professional series of electric waffle makers is engineered for consistent performance in commercial and home kitchens. Featuring robust stainless steel construction, these units offer adjustable temperature controls from 50 to 300°C to ensure precise cooking results. Available in various configurations including single and double plate models, they are designed to handle demanding high-frequency use while maintaining excellent heat distribution.
