

Electric Walkie Stacker 1500kg Capacity 2500mm Lift Height

This electric walkie stacker features a ride-on design and a stepless MOSFET controller for smooth operation. It utilizes high tensile German mast steel, offering a 1500kg capacity and a 2500mm lifting height.

Overview

Versatile Material Handling Solution

The Electric Walkie Stacker is a robust machine designed for efficient lifting and transportation of palletized loads in industrial and warehouse settings. Featuring a compact frame, it offers exceptional maneuverability in tight aisles while maintaining stable load control. With an integrated electric motor and ergonomic controls, this stacker ensures reliable performance and improved operational safety for demanding daily logistics tasks.

Max Lifting Height

2000 W

Lifting Motor Power

Technical Specifications

Equipment Specifications

Feature	Specification
Lifting Motor Voltage	DC24V
Driving Motor Power	1200W
Walking Speed	4.0 - 4.5 Km/h
Min Fork Height	50mm
Total Weight (with battery)	745kg

Design Features

Mast and Fork Configuration

1/1 Mast Type, Adjustable Forks, 1070mm Fork Length, Compact Design
