

Electric Waste Collection Truck

This electric garbage truck is designed for urban waste collection, featuring a compact chassis for maneuverability. It is equipped with a fully enclosed waste container and an automated loading system for efficient operation.

Overview

Urban Waste Management Solution

This electric garbage truck is specifically engineered for efficient waste collection in urban environments. Its compact chassis design ensures excellent maneuverability through tight city streets and narrow alleys. The vehicle features a fully enclosed waste container to effectively contain odors and prevent leakage, while the automated loading and unloading system streamlines collection operations. Powered by a high-capacity battery, it offers a sustainable, low-emission alternative for municipal waste services.
